Checklist

DASHBOARD

PASS The dashboard greets you by name and shows the open report count

OBSERVED Opened /dashboard — heading read "Good afternoon, Dana", open report count showed 3

ev-dashboard-greeting-01.png

REPORTS

PASS The Reports page lists the reports with their row counts

OBSERVED Opened /reports — table listed 3 reports: Q1 revenue = 412; Q2 revenue = 388; Churn cohort = 97

ev-reports-table-01.png

PASS On Reports, Export CSV downloads a CSV file of the table

OBSERVED Clicked Export CSV on /reports — reports-2026-08.csv downloaded, 57 bytes, header "Report,Rows", 3 data rows (Q1 revenue,412 ...)

The screenshot shows a web application with a top navigation bar containing 'Dashboard', 'Reports', and 'Settings'. The 'Reports' page is active, displaying a table with the following data:

Report	Rows
Q1 revenue	412
Q2 revenue	388
Charted profit	97

SETTINGS

FAIL Saving settings shows a confirmation message

Evidence: issue 01

OBSERVED After Save the toast element is still display:none; the DOM shows no confirmation node

The screenshot shows the 'Settings' page in the application. It includes a text input field for 'Display name' with the value 'Dana M. Marsh'. Below it is a checkbox labeled 'Send me the weekly digest' which is currently checked. At the bottom left of the form is a 'Save' button.

ev-settings-save-confirms-01.png

NOT TESTED The weekly digest preference survives the quarterly reconciliation

Issues

01

Expected: changing the display name on Settings and clicking Save shows a "Settings saved" confirmation.

URL /settings

CHECKLIST ITEM settings-save-confirms

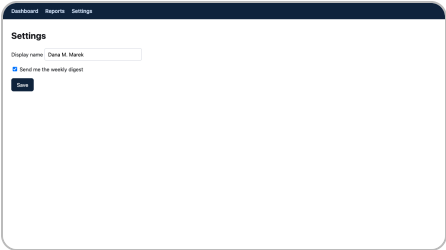

REPORTED 11 August 2026, 14:43 UTC

FIXED

Save handler looked up element id 'tost'; corrected to 'toast' so the confirmation shows · a1b2c3d

Observed: nothing appears — the confirmation stays hidden and no error is shown, so the user cannot tell whether the change was kept.

Steps: open /settings, edit Display name, click Save.
